

NEMA DOE Dimming Ballast Workshop

1. General dimming theory (frequency shifting and filament heating needs)
2. Dimming Interfaces (0 to 10, Power line, DALI) and testing setups
3. Update on CEC Dimming Ballast Regulation Interpretations and Title 20 Qualified Products List
4. Energy Efficiency test method (how to measure total output power from a dimming ballast) (New ANSI TP)
5. Alternative method being discussed by industry
6. Additional Items as Needed
